

# The One Field

Wed, Apr 24, 2024 12:09PM 2:07:56

## SUMMARY KEYWORDS

cells, people, experiment, consciousness, called, field, started, years, light, kryon, create, magnetic field, dna, energy, means, signal, world, measure, change, thought

---

01:31

I was five years old. I had been given an electrical toy for my birthday. And I didn't like the toy. But I took with the wires out of the toy and I walked to a wall plug and I put the wires into the wall plug and held on burn my body. My face was burned my eyelashes, my eyelids, my veins were burnt my hands were burned. And I couldn't speak

02:07

and why while I was waiting for the medical people to come, there were other people in my room. My mother told me no one was in there, but I could see them they were people that were helping to heal my body that we're not of this world

02:24

not very old, six, eight, and us and my grandfather. I asked him where did the Where do our thoughts go? When we die I was just like I couldn't understand. Where's our thoughts go

02:48

I remember how he looked. I don't remember what he said. But I remember how he looked at me. I could see that good question

03:18

and as I was playing it, i i went slick. I came out of my body. I went to another another period. And I was still playing the piece. But there was a chamber orchestra around me. And this was like a couple of 100 years ago. I remembered I remembered playing there's

03:51

layers and layers, energy, layers and layers of reality. Coming into this place. I could feel my

body filled with this light. And I could feel this impulse of infinite love. It was excruciatingly divine. Do

04:09

believe in this

04:21

there are people who were so called spiritual people, and they would talk these beautiful words of spirit you know, but even as a kid you could see that they didn't live any of the work so I really shied away from spirit I thought that that's not true. But science

04:42

I'm not spiritual right until this moment, and I realized oh my god Where do I come from?

04:49

The stars. Listen, my background. I'm an engineer. This is what I did for 40 years. 43 years of my life. It's extremely logical. It's very 3d. And and everything fits in a puzzle that makes sense. I love that. When I started stepping into the esoteric, all of the sudden there were invisible things that I could not explain. That did not fit into the puzzle.

05:20

Three years apart two men 40 years apart in age both of them had given the same phrase. There's a magnetic master named Kryon. Who wants to get a hold of you. It was on the tape. I heard it with my 3d years. All I could do and I did it without anybody around was sit in a chair and say, Okay, are you there? And nothing happened except a crime

05:54

there's receiving information from a very high intelligence, given the name Kryon. In the first books that were giving information was the way to inactivate a virus with magnetic and what was amazing to me is that what was written in the book was describing exactly the types of experiments I was doing at USC with the AIDS virus. And that was rather mind blown.

06:56

Shalom. We just completed an incredible Seven Days Tour all over Israel with an international group of over 300 people from over 35 countries from Angola, Australia, Austria, Belgium, Brazil, Bulqaria, Canada, Chile, Colombia, Denmark, Ecuador, France, Germany, Ireland, Israel,

Italy, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Poland, Portugal, Russia, Singapore, Spain, Switzerland, Thailand, United Kingdom, United Arab Emirates, or Agua and the United States. I'd like to call Mr. Lee Carol

07:48

you're interviewing for the first time an esoteric Channeler which almost nobody believes is real. When I speak about Kryon says this and Kryon says that, you know this sounds really strange to people. So I just wanted to know as an engineer, you have to understand there was a bridge to cross. My wife at the time she took me to a channeler I didn't want to go but it was her birthday. So I when this man sat in front of me and did basically what I do today. I laughed I didn't believe it. But it was recorded. Through three years later, she said there's another guy I want you to see. And I said no. She said look, it's only going to be 1520 minutes. Come on. So I went and I didn't like it. And I told her never again. And then I got to thinking about something and that is I heard them both say something that was interesting. They both said the word crayon. Greetings dear ones. I'm Kryon of magnetic service

09:00

and so now we are in Tel Aviv

09:04

in front of over 900 souls.

09:09

Is the man in the chair pretending or is there something here

09:18

wants you to take a moment. Look

09:21

at the reality is before you're now

09:25

listening to a man in the chair

09:28

and you're told it is the voice from beyond.

09:32

There is always the question, is it real? And humans find a time when they will allow space for what they don't believe is possible. It's not going to take long before your scientists start to see what I'm going to be calling the field. The field is a benevolent, harmonious vibration. If you harmonize with it with your consciousness you activate your cellular structure. Those who can totally and completely harmonize with the field can control physics.

10:30

We sit in the southern part of Israel. The view that is amazing.

10:37

And we're almost at the beginning

10:41

of the tour. Because that's what we said originally didn't we said to you, no matter what you see, in the next few days. Look for God inside.

10:55

Can you do this really? Really?

11:13

I was born a sensitive kid. I was always aware of that there was something out there. By the age of 14 I was walking on heroin the hill. We live in London then halfway up the hill. Suddenly it's like somebody sticks a Cuban cigar in my back. And it's hot. And it's like burning. Even the dogs stopped and he looks at me I looked at him I go oh something's happening. When you like grass, you have this whoosh and it slipped all at the same time. That's how it felt. I became within 30 seconds. An electro hypersensitive I suddenly have the feeling of like moving fields around my body. So I went up sat quietly under a tree and I started playing with my hands we what I could actually feel and that was the beginning

12:17

you feel hot, cold, tingling, movement and blood flow. You can be pulled you can be pushed. You can be effective from hundreds of meters. It is not connected to distance it's the ether feel

You can be effective from hundreds of meters. It is not connected to distance it's the other way.

 13:08

We are emerging from fingers all light beings. We all emanate photons all the time. So we are merging light coming from your fingers in electromagnetic field. I invented this instrument about 20 years ago was the system designed for doctors they can detect very detailed analysis of human condition.

 13:38

My name is Constantine Korotkov. I'm a scientist professor in quantum physics, biophysics, laser physics, atmospheric physics, cosmic physics, made the same constructing different instruments. More than 200 papers published in peer reviewed journals. I live in bookstores, the two main languages. So of course I was pure materialistic.

 14:06

My name is Bruce Lipton. I started out as a young child with a Russian Jewish father in the United States in the McCarthy period. And when I grew up in that McCarthy period, no matter how much they were against Russians and Jews, Albert Einstein was a hero of the world. And he was a Jew. And so Albert Einstein was my hero. That led me into science. I ended up teaching in a medical school, and I was teaching the conventional science of genes control your life. And this is an experiment that I did that changed my whole life. I have 50,000 genetically identical cells in a petri dish. All the cells came from the same parent. I split the cells into three different petri dishes. I changed the environment and each of the dishes and environment a the cells form muscle and environment be the cells form and environments see the cells form fat cells. Now you're left with the question, what controls the fate of the cells? And the answer is not the genes they were all exactly the same. The only thing that was different was the environment. But at this time, which is back in the early 70s. All the scientific world was so wrapped up in genes, that when I tried to show my experiments, my colleagues looked at it and said, Oh, that's, you know, there's just an artifact. It's not real. I left the system. I knew I was teaching the wrong information, that genes do not control things. Next month.

 15:45

We had this experiment in thermal an idea was to see whether we can detect in France to people from different parts of the world. I have five cameras, all those cameras will synchronize with our scientific instruments. All experiments was done in blind so people didn't know that to each moment. They've started to be friends.

 16:18

There's layers around the body and they go from one millimeter from the skin and out to a certain field around the body. between the skin and the edge of that field, there's a lot of more fields

16:41

when I started off by almost touching and then I moved slowly backwards, I am looking for the field that gives me the strongest sensation in the palm of the hand. When I find the right field, that field will start policy on polls to me it's just about the most mystical thing in the world. Because I have no idea what the policy is.

17:09

This sensitivity exists in all children up to the age of three, and then conditioning and I'm big or small. I'm smart, you're stupid. I tell you how the world is with that way not not. I tell you how the world is what I do, I believe anybody can do. I got 20 years of practice, but you can all do it. There's no mystery

17:48

how would you increase

17:51

different holes they are related to different functions. So the body before it was many holes and after become much more around it is no doubts. That was really clear effect. My

18:05

name is through aaronson. I am a Moxie taker, a closed open hand practitioner.

18:13

I left the system and I started to study quantum physics and Newtonian physics we say everything is mechanical. And then we created the picture of an atom like a little solar system with electrons spinning around. That's a mechanical picture created from a mechanical belief. Nobody saw the atom that was just an idea but around 1895. They started to say what makes up an atom. And they started to find there's something inside the atom were there electrons in the atom, there's a nucleus in the atom. These are all smaller particles. But then as I started to look into what makes up an electron, what makes up a proton or neutron, they found out inside of those things are nothing but energy. The universe is made out of energy. The physicist call it the field, the field of invisible energy.

19:08

Energy not seen. The time touches you in ways that are fascinating. What is that?

19:20

When you like to bottle it and take it home and analyze it you can?

19:25

Truly What is this?

19:32

Instead of looking and saying maybe there are missing laws of physics, we don't know about. But this is the human propensity. Take what is know observe what is unknown but there and place it into the boxes of unknown even if they don't make sense, even if they're mysterious. Welcome to dark man. Let me tell you one of the biggest places that you're missing the place of the physics of consciousness.

20:21

I work in the Princeton engineering anomalies Research Laboratory Phil I retired in 2002. But in 1997, I started the global consciousness project. What we have done is to create a network up to about 70 sites around the world. We have a random number generator attached to a computer which collects data continuously. A random number generator is a diode and a circuit that pushes electrons through a barrier. We sample a tiny voltage and we convert that into ones and zeros if the voltage as high as the one volt is as low as zero. We usually gather every second 200 of those ones and zeros. So we have from many of these random number generators, streams of data and we extract the data and draw a cumulative deviation graph. What's expected is for that graph to goes up a little down low and does not have a trend. But when some kind of information being added because of consciousness, we will see a trend upward or downward persistently. There is a correlation between the state of consciousness a person may have and the way these numbers develop. My name is Roger Nelson. I am the creator and the director of the global consciousness project.

21:54

He's a five time New York Times bestselling author and he's internationally renowned as a pioneer in bridging science spirituality and human potential ladies and gentleman whatever Tai Chi blue at Gregg Braden.

22:16

Long as programs together 15 years ago,

22:21

is a beautiful graph between one and two. There is a pretty strong trend. It's strong enough that it would be significant. So you have a group who is creating a group consciousness field is changing the behavior of this random number generator.

22:36

For 300 years science has asked the question, is there a field of energy that connects everything or is everything separate from everything else? That's the big question.

22:52

The field is the energy. The field is the origin of everything. That's what the music is actually doing. It's connecting to the field once you connect it to the field. You're in your power. My name is Robert Coxon. I'm a composer. And I've actually always done music since I was one and a half. And it's always been my passion.

23:31

I always believed that when I studied chemistry and geology and biology and physics, that what I was doing was understanding little pieces of a greater power. It's just the people didn't talk about it. So I never separated science from spirituality I asked the question rather than separating science, from spirituality. What if we marry these two great ways of knowing?

24:00

I am very stubborn man. The stubbornness comes from years of logic. I believe what I see. And to find out I have to know so I sat down in the chair I was alone. That is why there was only one avenue that would touch me and that's my heart. I had such emotion feeling of benevolence and caring and love. I've never had I realized there's something there is real. You still question and so it takes a time to adjust for it to prove itself over and over and over for you to see Okay, finally, I realized I would have to be on stage. That was almost death for me. The first time it was only for 10 or 15 people and I had to change shirts on the break. I was sweating so much. Oh, it was awful. I this is not for me. I don't want to do this. It's not me or cried said is use your life in Greece. When you were an orator. One who spoke eloquently. I got in front of the crowds that got bigger and bigger and I tried I said okay, I'm gonna pull in who I used to be who I was relaxed with crowds and all and you know, the more I did it, there was that's exactly what happened. Now I don't get nervous at all. The only thing that makes me nervous is I want to deliver the right message. Let us look at the power and the physics of consciousness.

25:37

someday there will be inventions in physics. And when they do.

25:48

You will see that consciousness is energy.

25:53

Consciousness. What human beings think collectively, can be measured? changes things, moves things, belief moves things.

26:16

My name is Lynne McTaggart. I am an international award winning author and journalist and I've written seven books. Four of them have been about science and spirituality. Hi, everybody. I wanted to put the idea that our thoughts are an actual something with the capacity to change physical matter to the ultimate test. And I wasn't really sure this is going to work idea

26:47

was to see whether it's possible to detect change of parameters of water under the influence of collective intention from as a part of the world. This

27:00

is our setup in St. Petersburg, Russia. The water sensor is our little bottle of water right

27:06

there. Bottle of water with sensor. We are playing very short electrical impulses to water. Our mission response of water conductivity of water in the age of water negative potential water so it's a combination of different parameters. I developed special sensor was putting this sensor can respond to human consciousness, distribution of standing electromagnetic waves in field. So it's physics. In simple words, we are measuring additional space depending on the amount of negative ions positive ions interrelation between them. And of course, activity as well. Plus generating field I don't own this measurement, totally automatic and forecloses so I didn't know at which moment they make this entrance. Miami was daytime in Sunday route was practically midnight.

28:08

Are we ready? Okay. A deep breath in and a deep breath deep breath in. Visualize that bottle of water. See yourself connecting with it. See your mind traveling all the way over to St Petersburg and sending intention to that water. Our intention is to send love to this water and

then it becomes part of our hearts and becomes pure and more alkaline. Keep filling the connection with everybody in the room. One big consciousness

29:10

and in your own time, come on back into the room

29:20

we ran a water experiment yesterday remember it? We didn't affect pH. We didn't change the light emissions. But we had an extraordinary effect on the environment around that water

29:35

every bar. It is 10 minutes measurement. It was an hour and a half 90 minutes.

29:40

All that blue is when it was turned on. All of the green is when I started talking. The red is that little 10 minute window of you doing your intention

29:55

signal separations and then signal tremendously dropped down.

30:00

It means a calmness, your calmness have an effect on a little bottle of water 1000s and 1000s of miles away

30:23

threshold opens a door the door in what you have called the field where there is no time there is no space there's not a place just as some say field as the other side of the veil. Some say the field is a magic place where your soul can go and relax for a little while before it comes. Back.

31:01

Just keep holding the tone

31:15

we are floating in the sea of Galilee. When you float you are not connected to the land. None of you right now. are grounded. So we're going to talk now about the soul

31:47

your ones you never die. This is not a new age belief. Go back as far as you can and find the texts of the belief of those Hindus and those Buddhists 1000s of years before we are prophets. What was the staple of their belief? Does soul return? Intuitive common sense? Spiritually made sense?

34:06

Me and my twin brother Amon. Is a soldier and also practice the purest form of the tunnel. We live in Varanasi. This city is very ancient and a center for knowledge

34:32

collection of 80,000 books and manuscripts in our house that collected by my grandfather Dentre York astrology within philosophy also keep me in this books. Some of them are really very own more than 1000 The US

34:58

government of India is helping us the scanning till now they calculate 7732 manuscripts

35:15

my grandfather when he was 21 years old, he left everything and started his spiritual. He did the double means when we follow the divine when we are alone from the society. Even those who lived his wedding many 1000 years ago. He appears to my grandfather and he blessed him with the knowledge engine knowledge how energy is active. Under project command bothering I read the doctrine practicing Bhriyu yoga. This knowledge I got through my father and he got this through his father. She's needed an embroidery machine.

36:36

According to Indian philosophy soul is observer inside

36:56

it Prakash de la shevet Michigan, dementia Keisha your Dhanesh Imitatio Dr. Medusa Let me hold up I'll learn it metabolism but as an IG Mounains Shuddha learning suck

hold up in learn it metabolism but as an is throughs Shadana learning back

 37:15

this universe is a part of infinity. So there are many energy channels in this infinite our use them to transfer this energy from me to

 37:40

we believe that everything is one. So this one active and activate all energy channels in one form. So Allah is not separate with me. I felt that she is very near to medium

 38:10

I was very strict physicist. But I was interested to study what is going on after this. So I organized big research had the team of doctors medical professionals. We've been studying people immediately after this and measuring their bodies and their progress of their energy. Once I have a call from one guy, who told me constantly something very strange happening, can you come for the hospital where we kept his body? I entered and I really feel that someone is looking. I feel I was able to detect where the Spirit is settled.

 38:55

When we have such good looking through, we expect to have stable there are no deep Sonic leaps or no equipment. When we see some pics from signal, then it means it was something in France.

 39:17

It was very clear proof for me that all these metaphysical ideas. It's not just imagination. It is a presentation of very deep wisdom. Very deep knowledge about the other side of life.

 39:40

Gosh De Soto sister of the investi

 39:56

This is sacrament from random measurements from time corner graphs. We were able to see that when he finished we had this strong on both graphs. We did this measurement twice to be sure that it's not just randomization. In the second experiment, he enters this increase of signal. Then he started meditating. Again a series of subtle signals coming up. Then it's coming coming coming in. Then he stops but signal still is coming up. It's after effect. If you put these

two graphs together, you see it's practicing different type of measurement. It's amazing. 1000s and 1000s of kilometres from India to be zero Dr. Midori was able to change physical products and orders mean physical process in this physical reality.

 40:57

I wish to speak on the prophet Elijah pretend for a moment sir alive. The name of the the light she comes to you and says I want you to write it down. Because I have chosen my time to transformation. Francis it was almost too bright to see. Alicia was touched. You almost couldn't write. He felt that I knew that. He received something. He was seeing the soul. So as Elijah began to raise in his vehicle and pride within more than they should continue to watch that Elijah was the best he could. You can find them today. First you got to see the higher sell yourself and see what's in the eyes that Alicia you see the same way they know they're wearing dry eautiful chariot you're going

 42:40

I've waited a long time

 42:43

to see where it happened. Same dirt same place

 43:07

right good. Now we tell you this is simply the DNA field fully activated. There's a field around you. It's a DNA field. It's a consciousness field. It is not your brain consciousness is not biology. It is the quantum portion of the DNA the 90% it is not understood by science is the quantum portion.

 43:51

Science very often unfortunately it goes through dogmas. DNA is one of these dogma only 1% is coding DNA. These are the genes and for a long time it was thought that all the remnant of the DNA 9598 99% was just junk DNA was garbage. Now we know that this is absolutely not true in order to understand what the cause is. We have to go to the vibration. My name is Carlo Ventura. I'm a cardiologist and a full professor of microbiology in the School of Medicine at the University of Bologna and I'm the Director of the National Laboratory of Molecular Biology and stem cell engineering at the National Research Council in Bologna. It was very, very young, it'd be less than 10. And I saw my mother, she was sick. I promised myself that even if I could not see what was making her being sick. I will find it and I will cure him

 45:15

.....

then I decided to become a doctor. Since I was a kid I was fascinated by playing with invisible. Playing with the invisible means playing with information playing with energies planning forces, these forces they have intelligence.

 45:38

Isaac Newton didn't put God or invisible forces or spirit he just measured physical things. So the body being a part of a mechanical universe is a machine so how you understand how the machine works. Take it apart study the pieces. So they were taking apart the body. They found there were cells and then they took the cells apart and they found that cells are made out of protein. And the question is who makes proteins? There was in 1944 that the first study revealed that if you took DNA from one species and put it into a bacterial culture of a different species, the bacterial culture will start to resemble the bacteria where the DNA came from. So then they sell the DNA makes the protein The next question is Who makes the DNA? Well, this is where science got screwed. Up. DNA is a double helix experiment they separated the double helix will have two single Gila C's. And they put those into a solution of building blocks and they pulled it out and it was a double helix again, the answer is clear. DNA makes itself and DNA makes the proteins at the end of the search. Once they found the DNA was important, it threw away the protein while they throughout the control the control was in the protein and proteins respond to environmental signals.

 47:03

Inside this darkened area, which is the nucleus, you have two meters of DNA, it's folding its loop of the DNA that has a vibrational cord. It has an electromagnetic emission. It's like flying it's continuously vibrating that thing is is stable. Our genes working as a symphony, and this the symphony of life

 47:34

the information which led me on the path of electromagnetic research with lasers that began with a vision, a vision of DNA. The vision that I had was that DNA is more than just physical chemistry. The information that was profound was that the structure of DNA and coils within coils DNA was also creating electromagnetic frequency information and that the DNA and the body was communicating with each other instantaneously like radios. The critical information was that by sending electromagnetic frequency information, we could literally vibrating a instructing I give it the information. You're the first six cells to become healthy, or old cells to become young.

 48:28

And you have hundreds 1000 molecules, they can exchange vibrations across these cables. are loving around the field. It's one field. This is chemistry, but it's a kind of dancing chemistry and you can talk to this chemistry with physics

48:51

the outer surface of the cell membrane is there a little antennas called receptors. And the receptors are responding to environmental signals. This is what changed my whole life in a minute, because I wasn't spiritual. I realized it's not the antennas. It's the signal coming to the antennas. Like a television set. I'm playing the Bruce show. But the broadcast is coming in. And if the body dies, broadcast is still there just like a television set.

49:28

I'm Dr. Todd Arcadis. I am a medical doctor. My highest level of training was as a specialist in pulmonary and Intensive Care Medicine. With that background I began to study laser biophysics and the ways that laser interact with biology

49:47

in 2010. When I produced the DNA book, we still thought that 90% of DNA was not functional. They called a junk DNA. It was only in 2012. I think that they discovered what it did. And it does what Kryon said it did and Kryon book 10.

50:09

The field is a sub reality that contains the potentials of everything that exists the potentials of the future. Free cognition is simply the identification of what is already there. It's just not a time for again, but it exists.

50:40

So becomes a little bit difficult to understand the nature of such an intelligence crime. But the information provided is particularly scientific, and I've

50:52

been with Lee all over the world. I've seen this phenomenon, time and time again. It is our ability to tune our hearts and minds into an energetic field in a way that allows information to be conveyed from one round to the next you can

51:09

pull that information from the field. Intuition means you've tapped into the knowledge that has been stored in that field.

51:21

Really good pieces, I don't feel that I'm writing them. And if I look at my CDs, and I see the most magical pieces on there, I have a very hard time saying I Robert Coxon wrote that it's coming through. I don't know where my hands are gonna go. But they go to the right place if I let them

 51:51

I love the idea of selling the empty chair. The chair is filled. But when Kryon comes in, I go away. When I first started, I thought what if I have a whole auditorium full of people and I sit in the chair and crying doesn't come. That was the biggest fear I had for the first few years then I realized it's not going to come here. It's already here. No angels are separate from the one God we put them there. Kryon says you've called me a name because that makes you comfortable. He says on the other side of the veil there is a collective, what you call God. Billions and billions of energies with one consciousness. We sit on the Mount of beatitudes you might hear the wind blowing in the background. Here is a statement I Am that I Am

 52:54

these two words together. You have to group them.

 53:00

The statement is very clear.

 53:04

I am part of the creative source. A piece of God.

 53:11

Now I asked you who are you? Really? As you sit there who are you?

 53:32

My name is Peggy Phoenix Dubrow and you're asking me who am I? I woke up when I was 22 that defines me. It was raised Christian. And I had learned that God was my father in my religion. But I didn't feel this love. My own childhood. I came from a pretty dark and dirty place. My father. He was a paranoid schizophrenic, alcoholic and he was very abusive to my brother and sister and I and I was the oldest. That's what drove me. I needed to know God the Father so I sat quietly in the living room. And I wrote, I want to remember God in every cell of my body. And in this time in this place in this moment. It was like veils of reality. fell away, layers and layers of energy. And then I could feel my body filled with this light and energy. I only knew I'm in this space that I just experienced the most exquisite divine love ever. And I just wanted to

share it. I just wanted to tell people, God is real and God loves us as we are. The first thing I did after having that experience is I went to the elders of my church. The elders of the church said we know who you are.

55:09

We know where you live. We know what

55:13

your life is like. You're dirty. Why would God talk to you?

55:20

There was just no way. So I went quiet. And then I began to study

55:28

15 years and deep study. And then I had a second experience. This light structures start to radiate out and the structure of the lightest showed itself. So it's fibers of light and energy. It's an extension of our sympathetic and parasympathetic nervous system that has feedback loops, infinity feedback loops that radiate. It is a system in our energy anatomy, like an energetic skin. And I started to see the lattice and people's energy fields. I've learned how to read the fibers of light and energy and what they have to say.

56:09

We are live

56:18

we have a symbol we use. You make the symbol the person doesn't know. It's like a antenna. Just just telling the universe ppbv dials up a resonance within you and within the person you're working with. Is a vibrational frequency that divine matrix understands.

56:55

This interesting, it was a big chunk of parameters. When aspect will jump but as we have time caught on with the cameras was founded in this particular moment. This lady Tamar, she put her hand to her heart. And if we look to her parameters, then we see level of energy increased tremendously. Maybe she felt something. That's why she put her hand to her heart.

57:23

Distance does not matter. Not a scientist I don't understand all this. I know that principles of it. Make me feel good.

57:33

There's a scientific study by a man called Cleve Baxter. He took cells from a human, put them in a petri dish and moved them 40 miles away.

57:42

They began to show powerful images to the person that had donated themselves graphic images of war destruction. Or comedy, humor, sexual images, anything to elicit a genuine emotional response the instant the instant that the person had the emotion. His cells acted as if they were still in his body having the same emotion. The

58:08

cells 40 miles away show the electrical activity of that response or so supporting this person cells are connected to this person but they're 40 miles away.

58:18

How did the information reach or did it? And the answer is it didn't have to travel. The field is holographic. What that means is what happens in one part of the field influences other parts of the field in the same instant and this is deeply, deeply profound.

58:38

Our thoughts are not contained in our head, or thoughts are broadcast to the field. If I put wires on your head as all EEG electroencephalograph, I can read your brain but there's a new technology called Magneto and Cephalo graph. The probe doesn't touch the head. The probe is out here I'm reading your brain activity from out here. Point, your brain activity is being broadcast. What

59:05

is the thought? Thought is a frequency of thought emits a vibration

59:13

from the most primitive organism all the way up to humans. All of us communicate by vibration.

Now does that mean no to go to the right place and not go to the wrong place vibes? For

59:23

every light frequency, there is a corresponding sound frequency for every sound frequency there is a corresponding light frequency. Every

59:33

atom has its own vibrational frequency.

59:36

We have a field of vibration. We have also photons. It is light thought is a particle of light. We can measure.

59:46

There was an experiment conducted by a physicist named Bell. You have a photon of that splits into two and they're so far apart that a signal cannot go from one to the other without going faster than light. So the question was if they could communicate instantly, that would mean that communication faster than the speed of light is possible. If there is entanglement of the waveform, and when the experiment was done. What they discovered very interestingly, was that the particles can communicate faster than light. Much as photons communicating you can view consciousness as also having wave characteristics, which means in consciousness, we can communicate and perceive anywhere throughout the entire universe.

1:00:42

So if thought can be measured as a wave function as a particle of light, or does light travel seven times around the planet in one second so cannot talk travel like that.

1:01:01

My name is Krishna Muda. I run an Institute for Science, spirituality and sustainability in the US my education has been engineering sciences and mechanical industrial engineering, biophysics and psycho nootropics. That has led me to deeper understanding into the sciences of light.

1:01:40

We sit on the Golan Heights, where many wars were and many Israelis will say it's only a matter of time and there will be another and another generation after generation after generation. Things haven't changed. If you have a sightless person in front of you, and they've

been sightless since birth. Sit with him a moment. Explain the spectrum of color. They don't know what they don't know. I say to Israel, you don't know what you don't know.

1:02:23

Color is coming.

1:02:49

When I was three years old, I was kind of dragged off to our local community church and remember my little feet hanging over the pews. The minister was up there with a sermon talking about a vengeful god. I was looking around at the big people all standing up and doing their things. I had this deep insight at that moment that wait a minute, you can't be believing this. This was an utter nonsense. I grew up in a small farming community. My grandfather was the mechanic for the community. He fixed all the tractors and cars and I would spend a lot of time hanging out with him. So I developed very early on a natural curiosity for how things work. What are radio waves? Electricity, I was never satisfied with our explanations of what is an electric field or what is a magnetic field. As I went to college, became an electrical engineer and worked for Motorola fixing high level communication systems. That really didn't feel like it was my path. Something was just missing. Another sports car in the driveway wasn't going to do what there was still that deeper hole. Something that really that I was really here to help humanity

1:04:04

deeply understood, not just mentally, that it's about consciousness is not about technology. Technology's not going to solve the world's problems until consciousness shifts. I'm Dr. Roland McCrady. I am director of research at the Heart Math Institute. We sent a number of these devices there's a number of people wore them at the same time. So we could see how their nervous system responded to these different activities. Whether it was meditating singing being in parts of channeling sessions and so on.

1:05:02

Soft as you can you just keep the tone guy and listen to the others. As if we were one voice as if we were all one voice very softly

1:05:26

if we look at this graph here, we see that during a meditation, the four people here that were being monitored at the same time is a lot of differences during the meditation, but really interestingly after that, when some singing was going on, we see a very clear change in the patterns of three of the four people. Very nice period of coherence a curb coherence has a very unique pattern. It's a very distinct different pattern than the rest of the rhythms. We know from many, many studies over many years close to 400 independent studies now have shown it is a

very beneficial state. Blood pressure is reduced hormonal balance shifts to more positive ratios. It's really when we have heartfelt emotions of connection with others love care, compassion, these positive regenerating feelings take us naturally into the spread optimal state that we call coherence.

 1:06:26

I can share who I really am through music, my voice just be able to close my eyes and go in that space. For me. It's more like it happens right now

 1:06:51

when I sing that's when I pray. As I wrote in my song, you know the one that started to lose some things going on. That I can't explain No matter how I use my brain. My name is honest halter. I'm from Denmark. My education was as a classical singer and conductor. My work changed completely direction 99 to one, I had a professor. She devoted her life to voice work with people when he was just always gave me a book. It was a book like so many books that talks about the possibility that there is a greater universe a greater existence happening beyond just this 3d world. And I was reading this and I was crying and crying and crying because it touched a point in me as if someone had recognized me. Oh, there is this option. I can feel this again. Oh yeah. And when I was singing I began to realize much more clearly. What is going on when I do that I had always loved it but the consciousness was the difference. Because when I see that's when that's when I pray

 1:08:33

all right

 1:08:44

are you good question. We're in the field. This is John. We found our scientist who was that? I think we can

 1:09:03

look at that.

 1:09:15

Oh, thank you. Hey, John remade it. This is good to see you. Man. This is good. I can't tell you how bad I was to hear your voice here at the end.

 1:09:21

1:09:31

Wonderful to see you.

1:09:33

This must be the most beautiful located laboratory in the world.

1:09:37

I don't know about that. But it's certainly a beautiful spot. I'm looking forward to testing

1:09:51

you all started back at the Great Pyramid in 1997. Three weeks before I was due to go out to Egypt. I severely injured my lower back. I thought I would have to cancel the whole mission. But somehow I managed to get into the pyramid. Other people carry the equipment the experiment that was designed was to make visible the resonances in the sarcophagus. I set up the experiment. Then I stretched PVC membrane across the open top of the sarcophagus. Then I sprinkled sand on the membrane and when we switched on the sound this is just pure tones electronically created tones. A whole range of ancient Egyptian hieroglyphs started to appear in the sound. First one was the hieroglyphs for backbone, your spinal column it was writing about like a snake antiquities inspector. He was like how you do that how you do that?

1:11:05

We saw lots of lots of different hieroglyphs coming out on this membrane. But what was so extraordinary was within 20 minutes of making sound. All the pain in my back, left me never did come around this extraordinary moment in my life. That changed my life forever. My name is John Stuart Reid and I'm an acoustic physics researcher

1:11:38

Pythagoras said that music could be used in place of medicine, got my attention, and I thought there must be some experiments that could be conducted where we can carefully measure the response of music to some sort of healing situation. The first experiment that I conceived was using blood to take a vial of blood and replace it into an incubator with a small loudspeaker in the incubator and that's feeding music to that blood at the same time that that's happening. We have another vial of the same blood. We have the Faraday cage, which is electromagnetic the screen, but it's also a very, very quiet environment. So that is not receiving any music it's just receiving quiet

1:13:52

we go through a protocol that first dilutes the blood by a certain ratio with a buffer solution.

And then we extract a small amount of that mixed blood when we put that blood into the cell counter. It will tell us how many cells are actually live and what the term is viable.

1:14:19

The cells in the Faraday cage have not fared very well at all. Mostly dead.

1:14:27

But if the cells are dead, that means the cells from the to the gut exposed to my voice. They'll be there too. I mean, it's the same blood.

1:14:39

I think we should probably repeat that though. And see if we get the same result. Strong companies

1:14:52

are still the same with that sample.

1:15:13

You can see this, dilute the sample more cells alive than the cell counter can count. That's a huge difference between the music and the quiet. Well, look,

1:15:30

this is amazing.

1:15:35

So I think we should repeat and see if we get the same result. Above the range that it can count. cells that are transiting towards being dead have been actually re enlivened to the extent that so many of them are now alive. An amazing result. Absolutely amazing. When we have a heartbeat, it creates a pressure wave and that allows the hemoglobin molecules take in some oxygen from the blood. The low frequencies from Anders voice or creating the similar sort of pressure waves that allows the blood to uptake the oxygen

1:16:28

people say okay, Bruce, you're studying cells in a plastic petri dish. What does that have to do

with me? It doesn't make a difference to the cell. If it's in a plastic dish or skin dish, it still responds to environmental signals. So the environment is controlling the cells but between the environment and the cells is the mind. And that does interpretation. If you open your eyes and see someone you love, your mind interprets love. And you release beautiful chemicals. Dopamine for pleasure, oxytocin for bonding. If I take the chemicals from brain perceives love and put them into a plastic petri dish, the cells grow beautifully. If I take the chemicals from a brain that perceives fear the cells stop growing and they start dying. So you're the one whose thoughts change the chemistry and the chemistry controls. The genetics. So all of a sudden, you're not a victim of your genes. You're the master of your genes.

1:17:34

We are on Mount Hermon. And it allows a view into Lebanon and Syria. Not too far from here, a dark army without borders.

1:17:49

Consciousness you have carried around for eons and eons and the darkness that you have seen and feel library. Where do you take your cue from? I'll tell you from the past isn't a time to change. You can change the past because of what the future holds. It means that the consciousness that expects a good future we'll back up and change that energy that says you're nuts is going to happen again. It's gonna happen again because it always does. Things that are happening in the future can change the past. Did you hear that?

1:18:35

We were able to send the cells back in time. So this was our experiment. We do cells for more than three months. It is a critical point where the cells are completely aged, they are not able to do anything they start to die. We found instead of exposing our stem cells to regulated field, we will be able to send the cells back in time in the cells started to proliferate again into differentiated. That means making ourselves baby again. It's like a time machine. Sound. Magnetic field lights are all diffusive energies they can pass through the valleys.

1:19:20

Our work has involved creating a new type of laser technology where we can take the ways that startup coherently and redefine their movement such that the waves are now exactly out of phase. And when we do that, and combine the waves together, the wave patterns cancel each other out. So we've created a new form that you can almost call invisible light when the waves in your perspective in this form, it goes much more deeply than worrying my laser. Instead of stopping the skin we can go deep into tissue. Our earliest experiments particularly involve working with HIV. Studies done at the University of Southern California where we completely remove the virus with no harmful effect on the cell, or work in Africa has taken that further creating a combination of nutrition plus waves with extremely good results. And most impressive case patient from South Africa who had virtually no immune system left in normal

CD for cow under 200 is a is in this patient started at a level of 23. Six months later, there is no detectable virus following him for five years his immune system recovered to a high normal 1100 the viral load was undetectable at that point.

1:20:54

Seeing the hieroglyphs that really inspired me I wanted to develop an instrument that would make sound visible. Ultimately, I developed the Simon scope instrument, which uses a very small volume of water that is exquisitely sensitive to vibration.

1:21:31

When any beautiful sound enters into the water what I see every day is a beautiful image. Beauty begets beauty. We all 90% Water. Think about the membranes around every cell in our bodies receiving a beautiful pattern, a harmonious pattern. Those cells are all going to be beautifully massaged, and feeling Wow, we're being supported here. And there's a very clear change when you compare a healthy cell sound with a cancer cell sound which produces ugly pattern so it's a whole new science as it is.

1:22:40

On second, she's supposed to actually be mentioning in the show is Luca Rakesh law level functional or the law says this The color by the LEDs has a lot of cycles. Say I need to clean. Shane to show it because I'm ashamed that I miss dishwashing.

1:23:43

Up for

1:23:48

the personas it again shows the passion because the physiotherapy if antigen develop inhalation should do at least my reaction was something that I can see which are valuable to an athlete immediate which you shall have a live action in he will create initiative at Hootsuite to the industry. And in coalition they name it Richard

1:24:24

you mentioned there are neither of the above data set called apologies TV. Templates my definition of

1:24:37

cheating family shish with conditioner. It's a true virtue keep it short and catchy immersion English to your baby started that child mention us in a private in a sophisticated laggy let's mess by Oh che you have such a lovely

1:25:11

time this situation in fact, which is an LFO Dodger whoop, gaff gaff, it seems actually shut down. So they're magnetic. Therefore they should not know what sheshe Eshoo football Mahadesh chill Africa but silica every time the petitioner who doesn't submission she Donalyn it hadn't incubated equal funding scheme you're like a bit of a Jose lo Shabazz DePaul shenana Basin workshop civitatis Obeah Catherine and her powerful machine. You must have been Namshi to plow ahead the push Rana will in a bullish notation. I hold on a common database of the very issue section. People benefited kappa gua because I'm going to throw me to pasture ROI fallacy. 1:26:42

and goes up. Corolla Nickelodeon. Consider the lion it's a human cardiac cell from fracking leading by this sensor we're recording this trace here is a vibrational code. We can listen to the sound produced by this vibration when the sound was given to non differentiated human stem cell, after two weeks, this has transformed into meeting myocardial cell

1:27:31

these are cardiomyocytes derived from human stem cells they became exactly like the cells from which we recorded the sound my main work in regenerative medicine and trying to fix a broken heart

1:27:54

you see the field is all around you. Field once harmony

1:28:03

for what that truly means. Is that unbalanced in your chemistry will result from unbalanced in your personality.

1:28:14

You heard everything that I have had to say about the beauty of compassion and what compassionate action means and you listen and you listen.

1:28:23

There are those who said Well, I'd like to harmonize but have had a whole life of a habit. This is just the way I work.

1:28:35

The right behind your forehead is a lump of brain called prefrontal cortex. This is the conscious mind. The conscious mind has wishes, desires, aspirations. What do you want from your life creative? conscious mind is about 10% The rest of the brain 90% is called the subconscious mind. The subconscious mind is primarily habits and the fundamental habits didn't come from me. The last trimester of pregnancy, and the first seven years of your life. Your brain is operating at a low vibrational frequency called theta and theta is hypnosis. How do you learn to be a member of a family and a community and a culture? You watch other people you focus on your family, see how they do everything you learn from everybody else. So the programs that you get for the first seven years are not yours. They came from other people, and they pass that on to you. But the problem is it's not just the previous generation the Generation before the generation before the general so we pass down through the family. Here's the problem. Big time. Science has found that 95% of our life, we're thinking when the conscious mind is thinking it's not paying attention when the conscious mind is not paying attention. The subconscious program is the default. Well if you understand that, then it says only 5% of the time you're running your life with your creative mind, the wishes and the desires and what you want 5% 95% of your life is coming from the program here but the program is not your wishes and desires. It's other people's behavior 95% of the day you are playing programs that psychologists tell us of limited, disempowering self sabotaging all of us, every one of us every day, plays programs that we don't see and they're not ours. All we see is a result. And we go oh my goodness, this is not what I wanted. You know, but this is what you created

1:31:04

this is something that changed my life. I was playing in a hotel and playing all the dance music the things that everyone plays. I was really depressed. Where am I gonna go from? You're playing another road to hell? How can I help people? I came home and I hugged the big maple tree in our front yard. And I asked that tree How come you are so powerful, you're so tall, majestic and beautiful. This wasn't a thought this I heard this in my ears. The tree says to me, because I never doubted that I was a tree. Never doubt that you're the master you know, I didn't wake up the next morning and suddenly I was this his great composure and, you know, I had to work on myself because I still had to get rid of the baggage. And it's taken many years

1:32:10

how we limit ourselves. Oh, I'm too short for this. I'm a woman I'm not a man. No if you say something great about yourself. You're recognizing the God within us so.

1:32:33

I was married very early. I was too young. It didn't work out. I was there 10 years and at one

I was married very early. I was too young. It didn't work out. I was there 10 years and at one point it's like out and it was so painful to get out. That every day when I would shave, I would go. I'll never get married again. I'll never get married again. So 17 years. Then I ended up meeting my partner Margaret. Every time we go on a date. I would say if you're looking for a relationship, it's not me. But if we have a good time today, then we'll probably go out tomorrow. At some point. We both started living day by day. We're living in the honeymoon. Life is beautiful. Everything is great heaven on earth. And I'm thinking about going to do my job. She comes up and asked me a simple loving question. And I turn around and go and she looks at me and goes, who are you? I didn't see what I did. I just it was automatic. Yeah, I was doing my father. Oh no, I was doing my mother. Oh no. I could see it, both of us and knowing about the subconscious, not getting into arguments about it. We both started to understand we could change these behaviors. I've been living with Margaret in a honeymoon state for 18 years. Not just that my relationship is beautiful. My life has become beautiful

1:34:10

Have you felt it yet? too profound profundity of this trip. It's just another tourist area, right. You're going to remember this time if you look at humanity, you haven't learned the basic

1:34:31

hatred begets hatred. War creates war. The human nature is not wise. It hasn't figured out the basis. of love.

1:34:45

The love.

1:34:49

Love is the glue that holds the universe together.

1:34:56

We have two satellites in the northern hemisphere, and each satellite will send back a signal and every 24 hours in the day the signals will have been no flow, the strength of the field will ebb and flow. A very similar way one day this feels just spiked right off the chart and scientists said What on earth is happening to create this spike? It was precisely the field spiked at 9am 15 minutes after the first plane hit the first Tower of the World Trade Center. September 11 2001. Many people of the earth found that we were more of a family. They held one another they cried together and they loved one another at least for a few days. And scientists attribute that closeness to the strength of the magnetic fields. This has led to a project is called GC i The Global coherence initiative headed up by the Institute of Heart Math. There are a series of earth based probes that are feeding the data of the magnetic field of the Earth

1:36:08

in order to save the still small voice of the heart. In reality, the voice of the heart is not so still and so small. It's just that the noise of the mind is so loud. The magnetic field produced for the heart it's about 100 times stronger than the magnetic field Crucifer the brain. We can measure the Hartsfield about a meter about three feet from the body. You can measure a brainwave about an inch away the heart through our nervous system extends far more neural information up to the brain when the brain sends to the heart. And the signals that the heart sends to the brain have profound influences on brain function. They go to every major center in the brain.

1:36:51

I'm going to share with you techniques that I've learned from the monks and the nuns and the shamans and the mystics that I've worked with in addition to HeartMath research. So now I'm inviting you to close your eyes. Invite you to allow your awareness to move from your mind and your heart and touch your heart center generally slow your breathing a little bit slower than usual. Five seconds on the inhale. Five seconds on the release

1:37:32

five seconds on the inhale

1:37:37

pause

1:37:41

five seconds Release. You're creating a very very sacred space in your body. It's the connection between your heart and your brain. When we can create coherence between the heart and the brain, we create signal that can be measured electrically 0.10 hertz, it's a very low frequency when

1:38:05

we get to inherit physiological lots of things we can measure how the heart and brain are becoming more synchronized. But we're also accessing intuition.

1:38:13

And when we were in optimum coherence, we're connected to the magnetic field of the Earth.

1:38:18

So we don't necessarily have to go to quantum effects and all of this, we all live within a magnetic field here on Earth. Our hearts magnetic fields are coupled to the Earth's magnetic field. And it's the big carrier wave. We're doing some innovative experiments to ask that question and prove it. So one of the first studies in California some of the volunteers were in the southern part of the state some of the Central Sun north, and they were going about their normal lives for 30 days. What we found is just group of people's heart rhythms was synchronized, slow wave synchronization. How can this be the only thing that could explain to us was if they were synchronizing to a signal that they were all exposed to? And that turned out to be a resonant frequencies in the Earth's magnetic field. The next question was was this happening globally? So we had groups of 20 people in five countries, California, Saudi Arabia, Lithuania, New Zealand, and in the UK. We had all the groups around the world do the meditation together at the same time, 15 minutes, the group globally became more synchronized in their local groups to each other, but they also became more synchronized to the Earth's magnetic field in a significant way. In fact, the data has even surprised us that we are far more interconnected and synchronized with the Earth's magnetic fields we ever would have predicted.

1:39:57

Back in 2008, I decided to see if we could use our consciousness to lower violence in war torn areas. So we decided to send intention over eight days to Sri Lanka, which at the time was going through a 25 year war for the scroll

1:40:12

down this page and look at the data of the peace intention in Sri Lanka. You can see there's a fairly steady trend away from what should be just a horizontal, random walk along that black line in the middle of the graph.

1:40:29

What is the significance of it being sort of under the lines that mean anything? We've seen

1:40:35

that numerous times, in fact has now become a kind of prediction that we make for great mass gatherings of people. The

1:40:43

really weird thing about this is that people aren't gathered they're actually sitting in front of their individual computer screens everywhere in the world. We had participants on this experiment from about 80 countries around the globe. What was really interesting was that a few months after that, that 25 year intractable war is over. If we do this, what you need to do in

order to start claiming that maybe consciousness had an effect is repeated over and over and over again. So we replicated it for the first time in 2011 to mark the 10th anniversary of 911. We've sent intention to lower violence into southern provinces in Afghanistan, what did you find we found the same

 1:41:31

data here driven in the direction of negative growing trend, in both cases, a larger span of time and also the very concentrated focused intention period,

 1:41:42

it was evident that violence in those two provinces had plummeted to levels that were far lower than before. So that was fascinating. And we ran one in Washington DC again, we lowered violence by about a third. That was just really confirmed again, in September, October 2017. Setting intention to lower violence in an area of St. Louis, the most violent Street in America. In

 1:42:11

this case, we have a little bit of a positive trend but then it takes on the very characteristic negative trend that we've seen for these kinds of experiments.

 1:42:20

A professor of statistics Dr. Jessica Oates from the University of California, she provided an analysis crime went up in three areas, the only thing that went down and went down hugely it was by 43%, compared to the year before, was violent crime in our area of focus fairground. It really says a lot about what group mind could possibly be.

 1:42:49

Everybody has always understood that we're connected in this way. Consciousness is not just a electrical activity in your head, but it is a kind of wonderful composition of heart and mind, and soul and spirit. When you

 1:43:06

put that all together. What we find is that science using the best techniques of the 20th and now the 21st century has born out the deepest truths of our most cherished and ancient spiritual traditions, saying we are connected to one another. We're connected to all things and what we think and what we feel is important. In our lives. It's important in this world

 1:43:30

1:43:36

during the last years in the late 1980s, the Cold War when the two superpowers at that time the former Soviet Union, the United States of America, they came this close to doing the unthinkable and unleashing nuclear weapons upon this world and civilian populations in a way that we've never seen. And I found myself working in the industry, hoping that that would never happen. By day, and by night. I found myself researching the ancient texts of our past, the Hebrew traditions, the Egyptian traditions, the Andean traditions, the Sumerian traditions, all of the ancient wisdom because I believe that those who have come before us left us the key to prevent the war that so many people believe we will still have. For that reason, my journey has taken me to some of the most remote, isolated, magnificent, pristine, beautiful places remaining in the world today. In the monasteries, and the libraries with the shaman and the healers, where they preserved the wisdom that we're only beginning to understand.

1:44:55

One evening, I climbed to the top of Mount Sinai, and I was alone. And as the last rays of the sun set behind the desert. The beauty overwhelming and this feeling welled up inside of me I asked myself a question. And it was about my life. And my role in the world if I left this world in this moment, if I died down, and I looked back on my life, and knew I could never come back when I feel complete with this lifetime, and before the question was even finished. This feeling inside of me was screaming No, no, I would not feel complete something something I had yet to accomplish. And that day became the reference point by which I gauge every choice, every decision, every relationship, every job, every career, everything I've done from that moment, because a lot of beautiful opportunities crossed my path. They're all beautiful. But which one will help me get closer to my yes

1:46:20

we have come to a place where over 960 documents ultimately, were found. Some of them 2200 years old. One of the most powerful documents, the war scrolls. It says that from the time the first humans have walked this earth there have been beings who are what are called the watchers. The Watchers are the ones that record with objectivity, the sons of lightness and the sons of darkness. In the end, one last great conflict between darkness and light and the text give us a choice. Will we perpetuate this cycle of darkness, suffering and war? Or will we wake up and choose a new cycle, a cycle of peace and cooperation? They always give us a choice. Will we choose peace?

1:47:29

on one platform, there is what we will call dark consciousness on one other platform light consciousness. Two years we told you be ready for the dark. It will not give up without a battle. And now the battle is here.

1:47:57

So all over the news. Everything that they are doing is calculated to scare you to death. Fear is black. If you shine your light and staying out of fear, the whole world will be brighter for it

black. If you shine your light and staying out of fear, the whole world will be brighter for it. Nothing can survive your light

1:48:35

the evening is here. Not too far away is the Dead Sea. breeze blows the chill of the air is coming. We sit in a profound place. An ancient place for me to give this the final message of

1:48:54

the Israeli series.

1:49:00

Have you ever wondered to what is the anti semitism about what would create this the conquerors would turn their eyes upon you and wipe you out? Destroying the temples or trying genocide

1:49:22

listen Israeli

1:49:26

this is your field.

1:49:59

So it is we start the journey the city on the hill is where you are. This is and always has been the symbol for the New Jerusalem in a world of peace

1:50:20

I got three different cells under three individuals, one individuals Muslim, another individual's Jewish, another individual is Christian. There's a difference come from the differences programming. Why is it important? The source is the same

1:50:43

all the channels we've given you in the last week have been profoundly given in love in love.

1:50:58

The term that shows in one's read refer to the Jews chosen to bring this planet a monotheistic God a one god that the one God would then be seen by the planet

1:51:24

and eventually, the entire planet would be unified with one god

1:51:32

which are not done

1:51:34

and the next part is as hard as the first because it is planetary as well dear ones. Listen. Clearly you are chosen

1:51:46

to bring peace here. When will they say and it's going to be so difficult it's not just us, you know it's them.

1:51:54

The situation is more than difficult. It's untenable. There is no solution that you can see what there is and you do it with consciousness.

1:52:09

That's what you're chosen for. The hardest thing the planet will ever see. peace in the region.

1:52:49

Day What's up slow and since she needs much money for the

1:53:14

Iraqi economy my walk with the Filipino Colombian Governor Shut up. Salaam Masha also talk to me India meal to have a custom good wishes to everyone blessings and love to Israel and all surrounding countries. God bless you.

1:53:45

So there we have somebody in different countries Saudi Arabia. Yes, there they are. We've got the UAE we've got Abu Dhabi. Let's see you and we've got to meet from Cyprus. We've got Bahrain we've got to wait cities. We have Jordan Amen. Yeah. Oh, the loud ones from Jordan. And we've got Oman Muscat. So we have people from all over the Middle East, coming together, Arabs and Israelis for a historic event and we also have many 1000s of people from all over the world participating on YouTube. One of the people responsible for this event is Dr. So long, I'll rush it and thanks to him. We are broadcasting in southern England in SmartWay studio. So are you ready to begin now everybody?

1:55:04

Jim from Korea good Salima via the split feature all.

1:55:12

Our intention is to lower violence and restore peace in the Old City of Jerusalem by at least 10% or more. Imagine it with your five senses. See people putting down their weapons. See people restoring peace there. See people hugging each other hugging strangers reaching across the aisle. Hold those intentions in your mind. As you imagine yourself holding the hands of everyone on either side of you. If you're watching on YouTube, imagine you're holding the hands of everybody, all the 1000s of people on this call

1:56:06

Can you feel the connection

1:56:13

are you seeing peace

1:56:20

in your own time open up your eyes and come on back into the room

1:56:38

would anybody like to talk to us about how that felt? Yes. So we have someone from a man. Oh man. How are you? Curious.

1:56:53

We all you're drying our tears falling down

1:57:05

you see on the road? It was written the piece is all.

1:57:25

Jeddah in Saudi Arabia

1:57:29

I saw myself

1:57:32

as pumped up for the Jews in spite of our breaking up to date.

1:57:45

feature was live we know it personally.

1:57:49

is so emotional.

1:57:56

The four quarters of the Old City as the four rooms of my personal heart

1:58:05

yes, you're on Abu Dhabi is dancing. Are they and love Tunisia. Children running and how

1:58:28

to the place I really love lost and thought much of joy and happiness. I wish. I wish.

1:58:41

My name is Joseph. It's so overwhelming the possibility to be connected with you, our sisters in a man and in Damascus and in Iran. And we say it's about time to unite. We are one time of compassion

1:59:06

is Fatima Lamia and the beasts in Arabic means celeb and my name is ALEMI. So I feel I feel in love. I love you. I love you.

1:59:35

Was unable to come here. So I asked my son to come to Jerusalem and to have these measurements. The moment when signal increased Jaffa Gate and it was after people finished meditation. There is no there is no number one it was beginning of the experiment. But then after they had this correct mutation it increased tremendously. Really big difference. And number three, it is same place but measured for a year before but it's very unstable signal. It means that under the influence of collective meditation of people we have balancing off environment

2:00:34

Yes, what did wanted the water respond? We had five sets of reduce baseline. The water just comes out on the tap you had expansion or contraction, bigger expansion shrinking again. inconsistency. The meditation began suddenly up suddenly down suddenly shooting up and going down the water when the experiment ended various levels of Spike Enos. After the meditation was done, everybody shared their heart tears came out deep compassion, deep love. Luminous quality of the water was the brightest, consistent, harmonious and symmetrical. Walk up in the morning. There's various ups and downs. It went even lower than the baseline. Why? This water received all this love and all of a sudden, c'est la vie. Everybody's gone.

2:01:38

like to ask you something the same the next lines with me is the owner of the director was eliminated. There's more than one language. So ask you to help me take the next time.

2:02:07

Then, when Dr. Battery started chanting, instruments, putting staying in the same room was able to detect decrease of parameters when he started silent meditation and it was even much stronger. When people meditate, it decreases the level of subjectivity. It decreases the level of noise electromagnetic noise and it makes everything much more harmonized.

2:02:44

Smile, friends all around the world.

2:02:50

We look at the data consists of all 32 instruments placed all around the world, mostly Europe and America, but some in Australia, some in Japan. And you can see in this case, very characteristic trend exactly during the event itself. What

2:03:07

your work does. It's so amazing is western mind needs proof.

2:03:11

When we do the statistics we gradually gather 500 experiments into one composite database. And when we look at the statistics for that the departure from what's expected for random number generators is what the physicists call seven sigma. The chance of that happening is one in a trillion it's basically a way of saying that we're pretty sure there's an effect

2:03:44

the charts and the graphs show a field is real, it exists. I want to take you to the rest of the way

2:03:53

you look into the eyes of the infant for the first time. What do you say,

2:03:56

mom? What could you say? What could you say?

2:04:00

I'm going to be with you all your lives. I'm going to protect you. I'm going to love you.

2:04:07

There is no measure to this. There is no measure emerging from you might put on your chest, open his eyes and he or she is the site is can't go there with the charts and the graphs and all that

2:04:27

they have and I can you see.

2:04:34

For science, you're getting love.

2:04:35

And then you find out that love may be a complement of science. That's why I came perhaps that's what you came to
